# **Independent Auditor's Report**

To the Shareholders of Sirios Resources Inc.

Raymond Chabot Grant Thornton LLP

Place du Québec 888 3rd Avenue Val-d'Or, Quebec J9P 5E6

Telephone: 819-825-6226 Fax: 819-825-1461 www.rcgt.com

We have audited the accompanying financial statements of Sirios Resources Inc., which comprise the statements of financial position as at June 30, 2016 and 2015 and the statements of comprehensive loss, the statements of changes in equity and the statements of cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

#### Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards (IFRS) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

#### **Opinion**

In our opinion, the financial statements present fairly, in all material respects, the financial position of Sirios Resources Inc. as at June 30, 2016 and 2015 and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRS).

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 1. NATURE OF OPERATIONS

Since its creation in 1994, Sirios Resources Inc.'s ("Sirios" or "the Company") goal is to discover world-class gold deposits in the James Bay region, in Quebec. Over the years, Sirios has developed extensive expertise in the exploration of this region.

#### 2. COMPLIANCE WITH IFRS

The financial statement of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") and on the basis of the going concern assumption, meaning the Company will be able to realize its assets and discharge its liabilities in the normal course of operations.

#### 3. GENERAL INFORMATION

The Company is incorporated under the Canada Business Corporations Act. The address of the Company's registered office is 1000, St-Antoine West, Suite 415, Montreal, Quebec, Canada. The Company's shares are listed on the TSX Venture Exchange, under the symbol "SOI".

#### 4. SUMMARY OF ACCOUNTING POLICIES

#### 4.1 Overall

The significant accounting policies and measurement basis that have been applied in the preparation of the financial statements are summarized below.

#### 4.2 Currency for operation and presentation

The financial statements are presented in Canadian currency, which is also the operational currency of the Company.

#### 4.3 Investment in associates

The associate, Khalkos Exploration Inc. ("Khalkos") is an entity over which the Company is able to exert significant influence but which is not a subsidiary. The investment in an associate is accounted for using the equity method and is initially recognized at cost plus transaction costs.

The carrying amount of the investment in an associate increased or decreased to recognize the Company's share of the profit or loss and other comprehensive income of the associate, adjusted where necessary to ensure consistency with the accounting policies of the Company.

If the Company's share of losses of associate equals or exceeds its interest in the associate, the Company discontinues recognizing its share of further losses. Additional losses are provided for, and a liability is recognized, only to the extent that the Company has incurred legal or constructive obligations or made payments on behalf of the associate.

#### **4.4** Financial instruments

#### Recognition, initial measurement and derecognition

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the financial instrument. Financial assets and financial liabilities are measured initially at fair value adjusted for transactions costs, except for financial assets and financial liabilities carried at fair value through profit or loss, which are measured initially at fair value.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 4.4 Financial instruments (cont'd)

Financial assets are derecognized when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and all substantial risks and rewards are transferred.

A financial liabilities is derecognized when it is extinguished, discharged, cancelled or when it expires.

Financial assets and financial liabilities are measured subsequently as described below.

#### Classification and subsequent measurement of financial assets

For the purpose of subsequent measurement, financial assets are classified into the following categories upon initial recognition:

- Loans and receivables;
- Financial assets at fair value through profit or loss.

All financial assets, except for those at fair value through profit or loss, are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is any objective evidence that a financial asset or a group of financial assets is impaired.

Objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty;
- default or delinquency in interest or principal payments; or
- it is becoming probable that the borrower will enter bankruptcy or financial reorganization.

All income and expenses relating to financial assets that are recognized in profit or loss are presented within Finance costs or Finance income, if applicable.

#### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial recognition, there are measured at amortized cost using the effective interest method, less provision for impairment. Discounting is omitted where the effect or discounting is immaterial. Cash and cash equivalents, term deposits and other receivables fall into this category of financial instruments.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets that are either classified as held-for-trading or that meet certain conditions and are designated at fair value through profit or loss upon initial recognition. The listed shares are classified in this category of financial instruments.

Assets in this category are measured at fair value with gains or losses recognized in profit or loss. The fair values of financial assets in this category are determined by reference to active market transactions.

#### Classification and subsequent measurement of financial liabilities

The Company's financial liabilities include trade and other payables, except salaries payable.

Financial liabilities are measured subsequently at amortized cost using the effective interest method.

All interest-related charges are reported in profit or loss within Finance costs, if applicable.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 4.5 Basic and diluted loss per share

Basic loss per share is calculated by dividing the loss attributable to common equity holders of the Company by the weighted average number of common shares outstanding during the exercise. Diluted earnings per share is calculated by adjusting loss attributable to common equity holders of the Company, and the weighted average number of common shares outstanding, for the effects of all dilutive potential common shares, which include options and warrants. Dilutive potential common shares shall be deemed to have been converted into common shares, at the average market price, at the beginning of the exercise, or, if after, at the date of issue of the potential common shares.

#### 4.6 Cash and cash equivalents

Cash and cash equivalents comprise cash in bank and term deposits are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

#### 4.7 Tax credits receivable

The Company is entitled to refundable tax credit on qualified exploration expenditures incurred and refundable credit on duties for losses under the Mining Tax Act. These tax credits are recognized as reduction of the exploration costs incurred based on estimates made by management. The Company records these tax credits when there is reasonable assurance with regards to collections and assessments and that the Company will comply with the conditions associated to them.

#### 4.8 Exploration and evaluation expenditures and exploration and evaluation assets

Exploration and evaluation expenditures are costs incurred in the course of initial search of mineral resources before the technical feasibility and commercial viability of extracting a mineral resource is demonstrable. Costs incurred before the legal right to undertake exploration and evaluation activities are recognized in profit or loss when they are incurred.

Once the legal right to undertake exploration and evaluation activities has been obtained, all costs of acquiring mineral rights or options to acquire such rights (option agreement), expenses related to the exploration and evaluation of mining properties, less refundable tax credits related to these expenses, are capitalized as exploration and evaluation assets. Expenses related to exploration and evaluation include topographical, geological, geochemical and geophysical studies, exploration drilling, trenching, sampling and other costs related to the evaluation of the technical feasibility and commercial viability of extracting a mineral resource. The various costs are capitalized on a property-to-property basis pending determination of the technical feasibility and commercial viability of extracting a mineral resource. These assets are recognized as intangible assets and are carried at cost less any accumulated impairment losses. No depreciation expenses are recognized for these assets during the exploration and evaluation phase.

Whenever a mining property is considered no longer viable or is abandoned, the capitalized amounts are written down to their recoverable amounts (see Note 4.10); the difference is then immediately recognized in profit or loss.

When technical feasibility and commercial viability of extracting a mineral resource are demonstrable, exploration and evaluation assets related to the mining property are transferred to property and equipment in Mining assets under construction. Before the reclassification, exploration and evaluation assets are tested for impairment (see Note 4.10) and any impairment loss is recognized in profit or loss before reclassification.

To date, neither the technical feasibility nor the commercial viability of extracting a mineral resource has been demonstrated.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 4.8 Exploration and evaluation expenditures and exploration and evaluation assets (cont'd)

Although the Company has taken steps to verify title to the mining properties in which it holds an interest, in accordance with industry practices for the current stage of exploration and development of such properties, these procedures do not guarantee the validity of the Company's titles. Property titles may be subject to unregistered prior agreements and noncompliance with regulatory requirements.

#### Disposal of interest in connection with option agreement

On disposal of interest in connection with the option agreement, the Company does not recognize expenses related to the exploration and evaluation performed on the property by the acquirer. In addition, the cash or the shares consideration received directly from the acquirer is credited against the carrying amount of costs previously capitalized to the property, and the surplus is recognized as a gain on the disposal of exploration and evaluation assets in profit or loss.

#### 4.9 Property and equipment

Property and equipment are held at cost less accumulated depreciation and accumulated impairment losses.

Cost includes all costs incurred initially to acquire or construct an item of property and equipment, costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management and costs subsequently to add to or replace part thereof.

Upon the transfer of exploration and evaluation assets to property and equipment under Mining assets under construction, all subsequent expenditures on the construction, installation or completion of equipment and infrastructure facilities are capitalized within Mining assets under construction. When development stage is completed, all assets included in the Mining assets under construction category are then transferred to Mining assets.

Depreciation is recognized on a straight-line basis to write down the cost to its estimated residual value, with a constant charge over the useful life of the asset. The periods generally applicable are as follows:

	Useful file
Exploration camp	3 years
Office furniture	5 years
Computer equipment	3 years

The depreciation expense for each period is recognized in profit or loss except for certain items of property and equipment related to exploration and evaluation activities where the depreciation expense is included in the carrying amount of an exploration and evaluation asset when it relates to a specific exploration and evaluation project.

The residual value, depreciation method and useful life of each asset are reviewed at least at each financial year-end.

The carrying amount of an item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. The gain or loss arising from the derecognition of an item of property and equipment is included in profit or loss when the item is derecognized.

#### 4.10 Impairment of exploration and evaluation assets and property and equipment

For the purposes of assessing impairment, assets are grouped at the lowest for which there are largely independent cash inflows (cash-generating units). As a result, some assets are tested individually for impairment and some are tested at a cash-generating level.

Heaful lifa

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 4.10 Impairment of exploration and evaluation assets and property and equipment (cont'd)

Whenever events or changes in circumstances indicate that the carrying amount may not be recoverable, an asset or cashgenerating unit is reviewed for impairment.

Impairment reviews for exploration and evaluation assets are carried out on a project-to-project basis, with each project representing a potential single cash generating unit. An impairment review is undertaken when indicators of impairment arise, but typically when one of the following circumstances apply:

- the right to explore the areas has expired or will expire in the near future with no expectation of renewal;
- no further exploration or evaluation expenditures in the area are planned or budgeted;
- no commercially viable deposits have been discovered, and the decision has been made to discontinue exploration in the area;
- sufficient work has been performed to indicate that the carrying amount of the expenditure carried as an asset will not be fully recovered.

Additionally, when technical feasibility and commercial viability of extracting a mineral resource are demonstrable, the exploration and evaluation assets of the related mining property are tested for impairment before these items are transferred to property and equipment.

An impairment loss is recognized in profit or loss for the amount by which the asset or cash-generating unit's carrying amount exceeds its recoverable amount. The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less cost to sell and its value in use.

An impairment loss is reversed if the asset or cash-generating unit's recoverable amount exceeds its carrying amount.

#### 4.11 Operating lease agreement

Leases in which a significant portion of the risks and rewards for ownership are retained by the lessor are classified as operating leases. Payments under an operating lease are recognized as an expense on a straight-line basis over the lease term. Related expenses, such as maintenance and insurance expenses, are charged as incurred.

#### 4.12 Provisions

Provisions are recognized when present legal or constructive obligations as a result of a past event will probably lead to an outflow of economic resources from the Company and amounts can be estimated reliably. Timing or amount of the outflow may still be uncertain. Provisions are measured at the estimated expenditures required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligation. Provisions are discounted when the time value of money is significant.

The Company's operations are governed by government environment protection legislation. Environmental consequences are difficult to identify in terms of amounts, timetable and impact. As of the reporting date, management believes that the Company's operations are in compliance with current laws and regulations. Site restoration costs currently incurred are negligible. When the technical feasibility and commercial viability of extracting a mineral resource have been demonstrated, a restoration provision will be recognized in the cost of the mining property when there is constructive commitment that has resulted from past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and the amount of the obligation can be measured with sufficient reliability.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 4.12 Provisions (cont'd)

No liability is recognized if an outflow of economic resources as a result of present obligations is not probable. Such situations are disclosed as contingent liabilities unless the outflow of resources is remote.

All provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

#### 4.13 Income taxes

Tax expense recognized in profit or loss comprises the sum of deferred tax and current tax not recognized in other comprehensive income or directly in equity.

Current income tax assets and/or liabilities comprise those obligations to, or claims from, fiscal authorities relating to the current or prior reporting periods, that are unpaid at the reporting date. Current tax is payable on taxable profit, which differs from profit or loss in the financial statements. Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period.

However, since the Company is in exploration phase and has no taxable income, tax expense recognized in profit or loss is currently comprised only of deferred tax.

Deferred income taxes are calculated using the liability method on temporary differences between the carrying amounts of assets and liabilities and their tax bases. However, deferred tax is not provided on the initial recognition of goodwill, or on the initial recognition of an asset or liability unless the related transactions is a business combination or affects tax or accounting profit.

Deferred tax assets and liabilities are calculated, without discounting, at tax rates that are expected to apply to their respective period or realization, provided they are enacted or substantively enacted by the end of the reporting period.

Deferred tax assets are recognized to the extent that it is probable that the underlying tax loss or deductible temporary difference will be utilized against future taxable income. This is assessed based on the Company's forecast of future operating results, adjusted for significant non-taxable income and expenses and specific limits on the use of any unused tax loss or credit. Deferred tax liabilities are always provided for in full.

Deferred tax assets and liabilities are offset only when the Company has a right and intentions to set off current tax assets and liabilities from the same taxation authority.

Changes in deferred tax assets or liabilities are recognized as deferred income tax expense in profit or loss, or directly in equity, in which case the related deferred tax is also recognized in equity.

#### 4.14 Equity

### Share capital

Share capital represents the amount received on the issue of shares. If shares are issued when options and warrants are exercised, the share capital account also comprises the compensation costs previously recorded as contributed surplus. In addition, if shares were issued as consideration for the acquisition of mineral property or some other from of non-monetary assets, they are measured at their fair value according to the quoted price on the day of the conclusion of the agreement.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 4.14 Equity (cont'd)

#### **Unit placements**

Proceeds from unit placements are allocated between shares and warrants issued using the residual method. Proceeds are first allocated to shares according to the quoted price of existing shares at the time of issuance and any residual in the proceeds is allocated to warrants.

#### Flow-through placements

Issuance of flow-through shares represents in substance an issue of common shares and the sale of the right to tax deductions to the investors. When the flow-through shares are issued, the sale of the right to tax deductions is deferred and presented as other liabilities in the statement of financial position. The proceeds received from flow-through placements are allocated between share capital and the liability using the residual method. Proceeds are first allocated to shares according to the quoted price of existing shares at the time of issuance and the residual proceeds are allocated to the other liabilities. The liability component recorded initially on the issuance of shares is reversed on renouncement of the right to tax deductions to the investors and when eligible expenses are incurred and recognized in profit or loss in reduction of deferred income tax expense. A deferred tax liability is also recognized for the taxable temporary difference that arises from the difference between the carrying amount of eligible amount of eligible expenditures capitalized as an asset and its tax basis.

#### Other elements of equity

Contributed surplus includes charges related to share options and warrants not exercised. When share options and warrants are exercised, the related compensation cost is transferred to share capital.

Deficit includes all current and prior retained profits or losses and shares issue expenses net of underlying income tax benefit from these issuance costs.

#### 4.15 Equity-settled share-based payments

The Company operates equity-settled share-based payment plan for its eligible directors, officers, employees and consultants. The Company's plan does not feature any options for a cash settlement.

All goods and services received in exchange for the grant of any share-based payments are measured at their fair values, unless that fair value cannot be estimated reliably. If the Company cannot estimate reliably the fair value of the goods or services received, the Company shall measure their value indirectly by reference to the fair value of the equity instruments granted. For the transactions with employees and others providing similar services, the Company measures the fair value of the services received by reference to the fair value of the equity instruments granted.

Equity-settled share-based payments (except warrants to brokers) are ultimately recognized as an expense in the profit or loss or capitalized as an exploration and evaluation asset, depending on the nature of the payment with a corresponding credit to contributed surplus in equity. Equity-settled share-based payments to brokers, in respect of an equity financing are recognized as issuance cost of the equity instruments with a corresponding credit to contributed surplus, in equity.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 4.15 Equity-settled share-based payments (cont'd)

If vesting periods or other vesting conditions apply, the expense is allocated over the vesting period, based on the best available estimate of the number of share options expected to vest. Non-market vesting conditions are included in assumptions about the number of options that are expected to become exercisable. Estimates are subsequently revised if there is any indication that the number of share options expected to vest differs from previous estimates. Any cumulative adjustment prior to vesting is recognized in the current period. No adjustment is made to any expense recognized in prior period if the number of share options ultimately exercised is different from that estimated on vesting.

#### 4.16 Segmental reporting

The Company presents and discloses segmental information based on information that is regularly reviewed by the chief operating decision-maker, i.e. the President and the Board of Directors. The Company has determined that there was only one operating segment being the sector of exploration and evaluation of mineral resources.

# 4.17 Standards, amendments and interpretations to existing standards that are not yet effective and have not been adopted

At the date of authorization of these financial statements, certain new standards, amendments and interpretations to existing standards have been published but are not yet effective, and have not been adopted early by the Company.

Management anticipates that all of the pronouncements will be adopted on the Company's accounting policies for the first period beginning after the effective date of each pronouncement. Information on new standards, amendments and interpretations that are expected to be relevant to the Company's financial statements is provided below. Certain other new standards and interpretations have been issued but are not expected to have an impact on the Company's financial statements

#### IFRS 9, Financial instruments

In July 2014, the IASB published IFRS 9 which replaces IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 introduces improvements which include a logical model for classification and measurement of financial assets, a single, forward-looking "expected loss" impairment model and a substantially-reformed approach to hedge accounting. IFRS 9 is effective for annual reporting periods beginning on or after January 1, 2018. The Company has yet to assess the impact of this new standard on its financial statements.

#### IFRS 16, Operating lease agreement

In January 2016, the IASB published IFRS 16, Leases ("IFRS 16") which will replace IAS 17, Lease ("IAS 17"). IFRS 16 eliminates the classification as an operating lease and requires lessees to recognize a right-of-use asset and a lease liability in the statement of financial position for all leases with exemptions permitted for short-term leases and leases of low value assets. In addition, IFRS 16 changes the definition of a lease; sets requirements on how to account for the asset and liability, including complexities such as non-lease elements, variable lease payments and option periods; changes the accounting for sale and leaseback arrangements; largely retains IAS 17's approach to lessor accounting; and introduces new disclosure requirements. IFRS 16 is effective for annual reporting periods beginning on or after January 1st, 2019 with early application permitted in certain circumstances. The Company has yet to assess the impact of this new standard on its financial statements.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 5. JUDGMENTS, ESTIMATES AND ASSUMPTIONS

When preparing the financial statements, management undertakes a number of judgments, estimations and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results are likely to differ from the judgments, estimations and assumptions made by management, and will seldom equal the estimated results. Information about the significant judgments, estimations and assumptions that have the most significant effect on the recognition and measurement of assets, liabilities, income and expenses are discussed below.

#### Significant management judgment

The following are significant management judgments in applying the accounting policies of the Company that have the most significant effect on the financial statements.

#### Recognition of deferred income tax assets and measurement of income tax expense

Management continually evaluates the likelihood that its deferred tax assets could be realized. This requires management to assess whether it is probable that sufficient taxable income will exist in the future to utilize these losses within the carry-forward period. By its nature, this assessment requires significant judgment. To date, management has not recognized any deferred tax assets in excess of existing taxable temporary differences expected to reverse within the carry-forward period (see Note 4.13).

#### **Estimation uncertainty**

Information about estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expenses are provided below. Actual results may be substantially different.

#### Impairment of exploration and evaluation assets

Determining if there are any facts and circumstances indicating impairment loss or reversal of impairment losses is a subjective process involving judgment and a number of estimates and assumptions in many cases (see Note 4.10).

When an indication of impairment loss or a reversal of an impairment loss exists, the recoverable amount of the individual asset or the cash-generating units must be estimated. If it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount of the cash-generating unit to which the asset belongs must be determined.

In assessing impairment, the Company must make some estimates and assumptions regarding future circumstances, in particular whether an economically viable extraction operation can be established, the probability that the expenses will be recover from either exploitation or sale when the activities have not reached a stage that permits a reasonable assessment of the existence of reserves, the Company's capacity to obtain financial resources necessary to complete the evaluation and development and to renew permits. Estimates and assumptions may change if new information becomes available. If, after, expenditures is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in profit or loss in the period when the new information becomes available.

See Note 8 for the exploration and evaluation assets impairment analysis.

For the exercise ended June 30, 2016, no impairment loss of exploration and evaluation assets was recognized in profit or loss (\$7,258 for the Hipo, Nasa and AAA properties on June 30, 2015). No reversal impairment losses has been recognized for the reporting periods.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 5. JUDGMENTS, ESTIMATES AND ASSUMPTIONS (cont'd)

#### Impairment of property and equipment

Determining if there are any facts and circumstances indicating impairment loss or reversal of impairment losses is a subjective process involving judgment and a number of estimates and assumptions in many cases.

In assessing impairment, management estimates the recoverable amount of each asset or cash-generating units based on expected future cash flows and uses an interest rate to discount them. Estimation uncertainty relates to assumptions about future operating results and the determination of a suitable discount rate. No impairment loss was recognized on June 30, 2016 and 2015.

#### **Share-based payments**

The estimation of share-based payment costs requires the selection of an appropriate valuation model and consideration as to the inputs necessary for the valuation model chosen. The Company has made estimates as to the volatility of its own shares, the probable life of share options and warrants granted and the time of exercise of the share options and warrants. The model used by the Company is the Black-Scholes valuation model.

#### Tax credits

The calculation of the Company's refundable tax credit on qualified exploration expenditures incurred and refundable tax credit involves a degree of estimation and judgment in respect of certain items whose tax treatment cannot be finally determined until a notice of assessment has been issued by the relevant taxation authority and payment has been received. Differences arising between the actual results following final resolution of some of these items and the assumptions made could necessitate adjustments to the refundable tax credit and refundable tax credit, exploration and evaluation assets, and income tax expense in future periods. See Notes 4.7 for more information.

#### (a) Aquilon

This 104 claims gold property is located near LA-1 hydro-electric complex in the James Bay area (Qc) and is owned at 50% by the Company (see Note 25-SUBSEQUENT EVENTS (b) ).

The Company signed, in June 2015, and amended on October 27, 2015, an option to sell its 50% interest in the property to a private company. A consideration of one million dollars has to be paid to Sirios no later than June 1st, 2016 in the following manner: \$20,000 in cash payment (received October 1st, 2015); cash payment of \$480,000 and payment of \$500,000 in capital stock of the buyer, 70% of the amount evaluated of the share price of the buyer at its first round of financing and 30% assessed of the price at the second round of financing. Since no additional consideration was received on June 1st, 2016, the option agreement has expired and is no longer in force.

#### (b) Cheechoo

The Cheechoo gold project consists of 145 claims owned by the Company (45%) and Golden Valley Mined Ltd. ("Golden Valley") (55%) (see Note 25-SUBSEQUENT EVENTS (a)). The property covers 7,400 acres in two distinct blocks adjoining the Eleonore gold deposit owned by Goldcorp Inc. It is located at approximately 13 km east of the discovery area of the Eleonore mine which is itself located 320 km north of Matagami (Qc).

During the previous exercise, management wrote-off the mining rights and exploration and evaluation expenses for the Hipo, Nasa and AAA properties for the following reasons: Abandonment of mining rights and/or non significant results following exploration fieldwork.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 9. EXPLORATION AND EVALUATION ASSETS (cont'd)

Following an agreement with the Company in 2005 (completed in 2009), Golden Valley has acquired a 60% interest in the property. On June 15, 2012, the Company signed an agreement with Golden Valley allowing Sirios to increase its interest by 5% (45%) by undertaking fieldwork for a minimum of \$800,000 by the end of 2012 (fulfilled). Following the completion of this work, and in accordance with the provisions of the agreement, the Company had until June 15, 2013 to inform its intention to acquire the remaining 55% from Golden Valley (informed). To acquire this additional interest, the Company would have to pay or issue to Golden Valley the lesser of 9.9% of its share capital or \$1M in cash of shares by December 31, 2013 (fulfilled), achieved within 3 years from the date of service of its intention to acquire the remaining interest, exploration work totaling \$5M and make a payment of \$500,000 (fulfilled). On June 30, 2016, an application for transfer of mining rights was filed and the case was being processed at the Ministère de l'Énergie et ressources naturelles du Québec. Golden Valley will keep a NSR from gold mineral products varying between 2.5% and 4% depending on the price of golf as well as 4% NSR from all other mineral products mined.

#### (c) Cheechoo-extension

The project, owned at 100%, consists of 11 claims in the James Bay area (Qc). It is located about 15 km south-west of the Eleonore gold deposit owned by Goldcorp and is adjacent to the west block of the Cheechoo property.

#### (d) Kukames

This gold property, owned at 100% by the Company, consists of 2 claims. It is located approximately 25 km southeast of the Eleonore gold deposit owned by Goldcorp Inc.

#### (e) Pontax

The property, owned at 100% by the Company, consist of 78 claims and divided in two non-continuous blocks of 70 and 8 claims. It is located in James Bay (Qc), approximately 350 km north of Matagami (Qc).

#### (f) Taïgor

The Taïgor property consists of 50 claims in James Bay (Qc).

#### (g) 33F06

The property consists of 39 claims and covers 20 km<sup>2</sup> in the James Bay area (Qc). It is located about 50 km southwest of Radisson (Qc) and about 20 km south of the LG-2 hydro-electric complex.

#### (h) Hipo

The property is located at around 80 km south of the LG-4 hydroelectric complex in James Bay (Qc). The property is centered on a volcano-sedimentary belt that has undergone little or no exploration until now.

#### 10. LEASES

The Company's future minimum operating lease payments are as follows:

	Mini	Minimum lease payment due		
	Within 1 year	1 to 5 years	Total	
	\$	\$	\$	
June 30, 2016	11,880	-	11,880	
June 30, 2015	12,960	11,880	24,840	

The Company leases its offices under a lease expiring May 31, 2017.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 10. LEASES (cont'd)

Lease payments recognized as an expense during the year amount to \$11,946 (\$12,428 on June 30, 2015). This amount consist of minimum lease payments.

#### 11. INVESTMENT ACCOUNTED FOR USING THE EQUITY METHOD

On June 30, 2016, the Company holds 18.71% (22.18% on June 30, 2015) voting and equity interest in Khalkos, a mining exploration and evaluation company, located in Quebec. The investment is reported using the equity method since January 2012. Khalkos has a reporting date of February 28. Shares of Khalkos are listed on the TSX Venture Exchange, under the symbol "KAS". On June 30, 2016, the fair value of the participation is \$1,038,807 (\$721,743 on June 30, 2015).

The aggregate amount of the associate company can be summarized as follows:

	June 30, 2016	June 30, 2015	
	\$	\$	
Current assets	329,013	266,972	
Non current assets	1,476,683	937,870	
Current liabilities	71,352	183,934	
Net loss and other comprehensive income	(458,872)	(1,236,652)	

The Company has not incurred any contingent liabilities or other commitments relating to its investment in this associate company.

A reconciliation of the above summarize financial information to the carrying amount of the interest set out below:

Total net assets       1,734,343       1,020,859         Contributed surplus not attached to common shareholders       (352,263)       (337,876)         Proportion of ownership interests held       18,71%       22,18%         Permanent effects of the change in the Company's interest from the settlement of an another receivable by issuance of shares by Khalkos       (57,371)       (43,051)         Capital gains balance       309,301       290,111         510,545       398,546		June 30, 2016	June 30, 2015

#### Variation of the ownership

During the exercise ended June 30, 2016, Khalkos issued shares to acquire mining rights, for the exercise of warrants, for the closing of private placement and for the settlement of accounts receivable. Those issuances decreased the Company's ownership from 22.18% to 18.71%.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 11. INVESTMENT ACCOUNTED FOR USING THE EQUITY METHOD (cont'd)

The Company received, during the exercise ended June 30, 2016, 445,052 shares of the share capital of Khalkos in settlement of an another receivable for a value of \$48,956. This transaction resulted in a gain on settlement of an another receivable of \$22,252, the Company's share of which consisted of \$4,682 following the settlement, was recorded as a reduction of the investment accounted for using the equity method and the remaining \$17,570 in net loss under financial income. Also, during the exercise, the Company participated in a private placement of Khalkos, receiving 192,308 shares, for a total amount of \$25,000. A total amount of \$86,133 corresponding to the capital gain resulting from this transaction is added to the cumulative capital gains of \$435,967 created at the loss of control. The total increase in value disposed of during dilutions that occurred since the loss of control is \$212,799.

During the year ended June 30, 2015, Khalkos issued shares to the Company to reimburse a debt, to acquire mining rights and for the closing of private placement. Those issuances increased the Company's ownership from 18.22% to 22.18%.

The Company received, during the exercise ended June 30, 2015, 2,625,439 shares of the share capital of Khalkos in settlement of an another receivable for a value of \$236,289. This transaction resulted in a gain on settlement of an another receivable of \$52,508, whose Company's share of \$16,063 following the settlement, was recorded as a reduction of the investment accounted for using the equity method and the remaining \$39,445 in net loss under financial income. An increase in value of \$131,295 resulting from this transaction was added to the initial increase in value of \$304,672 created at the time of the loss of control. The total increase in value disposed of during dilutions that occurred since the loss of control amount to \$145,856.

#### 12. PROVISIONS

Provisions relate to various taxation claims. The Company is not eligible for any reimbursement by third parties in this regard. Usually, these claims are settled between three and eighteen months for initiation, depending on the procedures used for negotiating the claims. As the timing of settlement of these claims is to a large extent dependent on the pace of negotiations with various counterparties and governmental authorities, the Company cannot reliably estimate the amounts that will eventually be paid in settlement after more than twelve months from the reporting date. Therefore, the amount was classified as current.

#### 13. LOAN

On December 20, 2013, the Company closed a total of \$150,000 in a loan with Société de développement de la Baie James (the "Lenders"). The loan bears an interest rate of 13% per annum (effective rate of 26.84% in 2015). The loan matured on December 20, 2015 (the "Maturity Date"), unless repaid or redeemed earlier in accordance with the terms and conditions of the loan.

The Company agreed to pay the Lenders structuring fees equal to 2% of the loan for \$3,000. The Company also incurred \$8,067 legal fees relating to the loan. Total expenses of \$11,067 were recorded against the loan and will be amortized over a period up to the Maturity Date. If the loan is repaid earlier, the unamortized portion of expenses will be amortized in full at the time.

On December 20, 2014, the Company reimbursed \$100,000. A residual amount of \$50,000 was still to be paid on June 30, 2015.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 13. LOAN (cont'd)

On July 20, 2015, the Company reimbursed the remaining amount to the Lenders. The remaining \$3,030 of transaction costs was amortized in full at that time.

#### 14. EQUITY

#### 14.1 Share capital

The share capital of the Company consists of fully paid common and preferred shares.

#### Authorized

Unlimited number of common shares without par value, voting, participating, dividend as declared by the Board of Directors.

Unlimited preferred shares, issuable in one or several series, composed of the number of shares, rights, liens, conditions and restrictions as determined before issuance by resolutions of directors of the Company, without par value. The preferred shares, serie A, are redeemable at the Company's option at their issuance price, non-voting and not entitled to dividends.

	Number of shares June 30,	
	2016	2015

- (a) On July 20, 2015, 1,771,500 warrants were exercised at a price of \$0.10 per share. An amount of \$177,500 was received at the exercise of those warrants.
- (b) On July 30, 2015, 357,143 warrants were exercised at a price of \$0.10 per share. An amount of \$35,714 was received at the exercise of those warrants.
- (c) On April 28, 2016, 85,000 warrants were exercised at a price of \$0.18 per share. An amount of \$15,300 was received at the exercise of those warrants.
- (d) On April 29, 2016, 37,500 warrants were exercised at a price of \$0.28 per share. An amount of \$10,500 was received at the exercise of those warrants.
- (e) On December 19, 2014, the Company completed the closing of a private placement for a total of \$477,610. It was composed of 6,823,001 units. The unit, offered at \$0.07, was composed of one common share and half a warrant. In total, 6,823,001 shares, as well as 3,411,500 warrants, were issued. Each warrant entitles its holder to subscribe for one common share at \$0.10 per share for a period of twelve months. No amount, related to warrants, was recorded.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 14.1 Share capital (cont'd)

(f) On December 19, 2014, the Company completed the closing of a flow-through private placement for a total of \$200,000. It was composed of 2,000,000 flow-through shares at a price of \$0.10 each. An amount of \$160,000 was recorded in share capital and an amount of \$40,000 was recorded as other liabilities in the statement of financial position.

The Company paid a finder's fee in cash of \$13,480 and issued 68,400 brokers' warrants entiling the holder to subscribe for one common share at a price of \$0.10 per share for a period of 12 months following the issuance of the warrant.

Other liabilities represent the difference between the share price at the time of issuance and the share price in the subscription agreement. When eligible expenditures have been incurred and the Company has transferred its right to deductions to investors, the amount recognized in other liabilities will be reversed and recognized in profit or loss as a reduction of deferred income tax.

(g) On June 30, 2015, the Company completed the closing of a flow-through private placement for a total of \$818,775. It was composed of 5,458,499 flow-through shares at a price of \$0.15 each. An amount of \$600,435 was recorded in share capital and an amount of \$212,340 was recorded as other liabilities in the statement of financial position.

Finder's fees of \$59,003 were settled in cash.

- (h) On August 6, 2015, the Company completed the closing of a private placement for a total of \$176,132. It was composed of 1,467,765 units. The unit, offered at \$0.12, was composed of one common share and half a warrant. In total, 1,467,765 shares, as well as 733,883 warrants, were issued. Each warrant entitles its holder to subscribe for one common share at \$0.18 per share for a period of eighteen months. An amount of \$14,678, related to warrants, was recorded as an increase in contributed surplus.
- (i) On August 6, 2015, the Company completed the closing of a flow-through private placement for a total of \$80,000. It was composed of 533,333 flow-through shares at a price of \$0.15 each. An amount of \$58,667 was recorded in share capital and an amount of \$21,333 was recorded as other liabilities in the statement of financial position.

Finder's fees of \$6,000 were settled in cash.

- (j) On September 17, 2015, the Company completed the closing of a private placement for a total of \$555,480. It was composed of 4,629,000 units. The unit, offered at \$0.12, was composed of one common share and half a warrant. In total, 4,629,000 shares, as well as 2,314,500 warrants were issued. Each warrant entitled its holder to subscribe for one common share at \$0.18 per share for a period of eighteen months. An amount of \$46,290, related to warrants, was recorded as an increase in contributed surplus.
- (k) On September 17, 2015, the Company completed the closing of a flow-through private placement for a total of \$163,750. It was composed of 1,091,664 flow-through shares at a price of \$0.15 each. An amount of \$120,083 was recorded in share capital and an amount of \$43,667 was recorded as other liabilities in the statement of financial position.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 14.1 Share capital (cont'd)

- (1) On March 2, 2016, the Company completed the closing of a private placement for a total of \$1,021,540. It was composed of 7,858,000 units. The unit, offered at \$0.13, was composed of one common share and half a warrant. In total, 7,858,000 shares, as well as 3,929,000 warrants, were issued. Each warrant entitled its holder to subscribe for one common share at \$0.20 per share for a period of eighteen months. No amount, related to warrants, was recorded.
- (m) On April 22, 2016, the Company completed the closing of a private placement for a total of \$3,500,000. It was composed of 17,500,000 units. The unit, offered at \$0.20, was composed of one common share and half a warrant. In total, 17,500,000 shares, as well as 8,750,000 warrants, were issued. Each warrant entitled its holder to subscribe for one common share at \$0.28 per share for a period of eighteen months. No amount, related to warrants, was recorded.
- (n) On April 22, 2016, the Company completed the closing of a flow-through private placement for a total of \$2,000,000. It was composed of 6,666,667 flow-through shares at a price of \$0.30. The full amount was recorded in share capital.
- (o) On April 11, 2016, 300,000 options were exercised at a price of \$0.15. An amount of \$45,000 was received and an amount of \$33,000, representing the fair value of options at issuance was recorded as an increase in share capital.
- (p) On April 18, 2016, 200,000 options were exercised at a price of \$0.16. An amount \$32,000 was received and an amount of \$22,000, representing the fair value of options at issuance, was recorded as an increase in share capital.
- (q) On April 25, 2016, 125,000 options were exercised at a price of \$0.10 and 40,000 options at a price of \$0.12. A total amount of \$17,300 was received and a total amount of \$11,000, representing the fair value of options at issuance, was recorded as an increase in share capital.
- (r) On April 29, 2016, 25,000 options were exercised at a price of \$0.10. An amount of \$2,500 was received and an amount of \$1,500, representing the fair value of options at issuance, was recorded as an increase in share capital.
- (s) On May 20, 2016, the Company issued 1,250,000 common shares to Golden Valley to acquire the remaining 55% of the Cheechoo property. An amount of \$500,000 was recorded in share capital and as an increase of exploration and evaluation assets.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 14.2 Warrants

Outstanding warrants entitle their holders to subscribe to an equivalent number of ordinary shares, as follows:

	June	June 30, 2016		0, 2015	
	Number of warrants	Weighted average exercise price	Number of warrants	Weighted average exercise price	
		\$		\$	
Balance, beginning of the exercise	3,479,900	0.10	5,943,572	0.14	
Issued	15,727,383	0.24	3,479,900	0.10	
Exercised	(2,251,143)	(0.11)	-	-	
Expired	(1,351,257)	(0.10)	(5,943,572)	(0.14)	
Balance, end of the exercise	15,604,883	0.24	3,479,900	0.10	

During the exercise ended June 30, 2015, the Company recorded an amount of \$684 as an issuance cost for brokers' warrants issued. The fair value was recorded as an increase of the contributed surplus and the deficit.

The weighted average fair value of the brokers' warrants granted, during the exercise ended June 30, 2015, was \$0.01 and was determined using the Black-Scholes model and based on the following weighted average assumptions:

	2015
Average share price at the date of issuing	\$0.08
Expected interest average rate	1.01%
Expected average life	1 year
Expected weighted volatility	62.68%
Expected dividend yield	0%
Average exercise price at the date of grant	\$0.10

The underlying expected volatility was determined by reference to historical data of the Company over the expected average life of the warrants.

The number of outstanding warrants which could be exercised for an equivalent number of common shares is as follows:

	June 3	30, 2016	June 3	30, 2015
Expiration date	Number of warrants	Exercise price	Number of warrants	Exercise price
		\$		\$
December 19, 2015	-	-	3,411,500	0.10
December 19, 2015	-	-	68,400	0.10
February 6, 2017	733,883	0.18	-	-
March 17, 2017	2,229,500	0.18	-	-
September 2, 2017	3,929,000	0.20	-	-
April 22, 2017	8,712,500	0.28	-	-
	15,604,883	0.24	3,479,900	0.10
		-		

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 15. EMPLOYEE REMUNERATION

#### 15.1 Salaries and employee benefits expenses

Salaries and employee benefits expenses recognized are analyzed below:

_	June 30,	
	2016	2015
	\$	\$
Salaries and benefits	504,837	284,853
Share-based payments	88,800	134,000
	593,637	418,853
Less: salaries and share-based payments capitalized in Exploration and evaluation		
assets or presented in Project generation expenses	(263,807)	(85,492)
Salaries and employee benefit expenses	329,830	333,361

#### 15.2 Share-based payments

The Company has a share-based payments plan for eligible directors, officers, employees, consultants and service suppliers of investors' relations. The most important terms of the plan are as follows:

- i) the maximum number of shares that may be issued under the plan is limited to 10% of the issued shares at the time of the grant of the option, with a maximum of 10,131,181 on June 30, 2016 (5,737,423 on June 30, 2015);
- ii) the maximum number of shares that can be reserved for a beneficiary is limited to 5% of issued and outstanding shares:
- iii) the maximum number of shares that can be reserved for a consultant during a 12 months period is limited to 2% of issued and outstanding shares;
- iv) the maximum number of shares that can be reserved for a supplier of investors' relation services during any 12 months period is limited to 2% of issued and outstanding shares; moreover, the options granted may be exercised by steps over a period of 12 months after the grand, at the rate of 25% per quarter.
- v) the options granted to directors, officers, employees and consultants may be exercised entirely at the date of the grant.

The options' term cannot exceed ten years. The option exercise price is established by the Board of Directors and may not be lower than the market price of the common shares at the time of the grant.

All share-based payments will be settled in equity. The Company has no legal or constructive obligation to repurchase or settle the options in cash.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 15.2 Share-based payments (cont'd)

The Company's share options are as follow for the period presented:

	June 30, 2016		June 3	30, 2015	
	Number of options	Weighted average exercise price	Number of options	Weighted average exercise price	
		\$		\$	
Outstanding, at the beginning of the exercise	5,075,000	0.19	3,392,857	0.25	
Granted	1,480,000	0.10	1,800,000	0.11	
Exercised	(690,000)	(0.14)	-	-	
Expired	(128,571)	(0.70)	(117,857)	(0.70)	
Outstanding, at the end of the exercise	5,736,429	0.16	5,075,000	0.19	

The weighted average share price at the date of exercise was \$0.36 in 2016.

The weighted average fair value of stock options granted is \$0.06 each (\$0.07 for the exercise ended June 30, 2015) and was estimated using the Black-Scholes model and based on the following weighted average assumptions:

	2016	2015
Average share price at the date of issuing	\$0.09	\$0.10
Expected interest average rate	0.56%	0.76%
Expected average life	5 years	5 years
Expected weighted volatility	93%	104%
Expected dividend yield	0%	0%
Average exercise price at the date of grant	\$0.10	\$0.11

The underlying expected volatility was determined by reference to historical data of the Company's share over the expected average life of the options. No special features inherent to the options granted were incorporated into measurement of fair value.

The table below summarizes the information related to outstanding share options as of June 30, 2016 and 2015:

	June 30, 2016		June 30, 2015	
Range of exercise price	Number of options	Weighted average remaining contractual life (years)	Number of options	Weighted average remaining contractual life (years)
From \$0 to \$0.50	5,565,000	3.15	4,775,000	3.73
From \$0.51 to \$1.00	171,429	0.96	300,000	1.49
	5,736,429	- = =	5,075,000	- -

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 15.2 Share-based payments (cont'd)

In total, \$88,800 of share-based payments (all of which related to equity-settled share-based payment transactions) was recorded (\$73,021 in profit or loss, \$69,903 as salaries and employee benefit expenses and \$3,118 as project generation expenses and \$15,779 capitalized in exploration and evaluation assets) for the exercise ended June 30, 2016 (\$129,408 in profit or loss, \$128,000 as salaries and employee benefit expenses and \$1,408 as project generation expenses and \$4,592 capitalized in exploration and evaluation assets for the exercise ended June 30, 2015) and credited to contributed surplus.

#### 16. FAIR VALUE MEASUREMENT

#### 16.1 Fair value measurement of financial instruments

Financial assets and liabilities measured at fair value in the statement of financial position are grouped into three levels of a fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: unobservable inputs for the assets or liabilities.

The fair value of the listed shares have been estimated by reference of their quoted prices at the reporting date.

Listed shares, measured at fair value, in the statement of financial position on June 30, 2016 and 2015, are classified in Level 1.

#### 17. FINANCE COSTS AND INCOME

Finance costs can be analyzed as follow for the reporting periods presented:

	June 30,	
	2016	2015
	\$	\$
Interests on trade accounts	(223)	(3,155)
Interests on loan	-	(13,000)
Amortization of fees related to loan	(3,030)	(5,472)
	(3,253)	(21,627)
Finance income can be analyzed as follow for the reporting periods presented:		
	June 30,	
	2016	2015
	\$	\$
Interests income from cash and cash equivalents	5,745	599
Interests income from tax credits received	-	2,583
Gain on settlement of an another receivable	17,570	39,445
Change in fair value of listed shares	44,882	14,961
	68,197	57,588

Juna 20

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 18. LOSS PER SHARE

In calculating the diluted loss per share, dilutive potential common shares such as share options and warrants have not been included as they would have the effect of decreasing the loss per share. Decreasing the loss per share would be anti-dilutive. Details of share options and warrants issued that could potentially dilute earnings per share in the future are given in Notes 14.2 and 15.2.

Both the basic and diluted loss per share have been calculated using the net loss as a numerator, i.e. no adjustment to the net loss was necessary in 2016 and 2015.

	June 30,	
	2016	2015
Net loss	\$(502,621)	\$(840,941)
Weighted average number of shares	73,214,398	47,771,749
Basic and diluted loss per share	(0.007) \$	(0.018) \$

For transactions on common shares between the reporting date and the date of publication of the financial statements, see Note 25-Subsequent events.

#### 19. INCOME TAXES

#### Relationship between expected tax expense and accounting profit or loss

The relationship between the expected tax expense based on the combined federal and provincial income tax rate in Canada and the reported tax expense in the statement of comprehensive income can be reconciled as follows:

_	2016	2015
	\$	\$
Expected tax recovery calculated using the combined federal and provincial		
income tax rate in Canada, 26.90% in 2016 and 2015	(215,986)	(246,508)
Adjustments for the following items		
Tax effect of issuance of flow-through shares	315,717	127,850
Reversal of the other liabilities attributable to issuance of flow-through shares	(300,300)	(75,446)
Temporary differences unrecognized	(103,063)	16,458
Share-based payments	19,643	34,811
Variation of non-deductible fair value (non-taxable)	(6,037)	(2,012)
Other non-deductible expenses	(10,274)	69,401
	(300,300)	(75,446)
Major components of tax expenses		
	2016	2015
	\$	\$
Inception and reversal of temporary differences	(212,654)	(144,308)
Tax effect of issuance of flow-through shares	315,717	127,850
Reversal of the other liabilities attributable to issuance of flow-through shares	(300,300)	(75,446)
Temporary difference unrecognized	(103,063)	16,458
	(300,300)	(75,446)

4,682	13,063
	\$ 509,234 315,854 15,779 500,000 71,208

#### 21. RELATED PARTY TRANSACTIONS

The Company's related parties includes an associated company and its key management personnel. Unless otherwise stated, none of the transactions incorporate special terms and conditions and no guarantee was given or received. Outstanding balances are usually settled in cash. During the exercise, Sirios provided administrative services to an associated company, Khalkos, totaling \$99,105 (\$71,847 for the exercise ended June 30, 2015). These transactions occurred in the normal course of business and were measured at the exchange amount, which is the consideration established and agreed by the parties.

#### 21.1 Transactions with key management personnel

The remuneration of the Company's key management personnel and the president includes the following expenses:

	June	30,
	2016	2015 \$
	\$	
Salaries and benefits	237,301	143,105
Consulting fees	78,500	27,000
Share-based payments	64,504	114,500
Total remuneration	380,305	284,605

#### 22. CAPITAL MANAGEMENT POLICIES AND PROCEDURES

The Company's capital management objectives are:

- To ensure the Company's ability to continue as a going concern;
- To increase the value of the assets of the business; and
- To provide an adequate return to shareholders.

These objectives will be achieved by identifying the right exploration projects, adding value to these projects and ultimately taking them through to production or sale and cash flows, either with partners or by the Company's own means.

The Company monitors capital on the basis of the carrying amount of equity.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 22. CAPITAL MANAGEMENT POLICIES AND PROCEDURES (cont'd)

The Company is not exposed to any externally imposed capital requirements except when the Company issues flow-through shares for which an amount should be used for exploration work. See all details in Notes 14.1 and 24.

The Company finances its exploration and evaluation activities principally by raising additional capital either through private placements or public offerings. When financing conditions are not optimal, the Company may enter into option agreements or other solutions to continue its activities or may slow its activities until conditions improve.

#### 23. FINANCIAL INSTRUMENT RISKS

The Company is exposed to various risks in relation to financial instruments. The main types of risks the Company is exposed to are credit risk and liquidity risk.

The Company focuses on actively securing short- to medium-term cash flows by minimizing the exposure to financial markets. The Company does not actively engage in the trading of financial instruments for speculative purposes.

The most significant financial risks to which the Company is exposed are described below.

#### 23.1 Credit risk

Credit risk is the risk that another party to a financial instrument will cause a financial loss for the Company by failing to discharge an obligation.

The maximum exposure to credit risk is limited to the carrying amount of financial assets at the reporting dates, as summarized below:

June 30,	
2016	2015
\$	\$
4,835,803	771,227
300,000	-
21,639	13,926
5,157,442	785,153
	2016 \$ 4,835,803 300,000 21,639

Other receivables are advances to an associate company and advances to officers (advances to an associate company in 2015), therefore, the exposure to credit risk for the Company's receivable is considered limited. The Company continuously monitors defaults of counterparties. No impairment loss has been recognized in the periods presented.

The Company's management considers that all the above financial assets that are not impaired or past due for each of the reporting dates under review are good credit quality.

No allowances for credit losses was recognized on June 30, 2016 and 2015.

The credit risk for cash and cash equivalents and term deposits is considered negligible, since the counterparties are reputable banks with high quality external credit ratings.

#### 23.2 Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

# Notes to Financial Statements As of June 30, 2016 and 2015

(in Canadian dollars)

#### 23.2 Liquidity risk (cont'd)

Liquidity risk management serves to maintain a sufficient amount of cash and to ensure that the Company has financing sources such as private and public investments for a sufficient amount.

During the exercise, the Company has financed its exploration and evaluation programs, its working capital requirements and acquisitions of mining properties through private and flow-through financings.

The following table shows the contractual maturities (including interest payments, if any) of financial liabilities of the Company:

	June 30,	
	2016	2015
	\$	\$
Less than six months		
Trade and other payables	390,760	131,761
Loan		53,258
	390,760	185,019

The Company considers expected cash flows from financial assets in assessing and managing liquidity risk in particular its cash and cash equivalent and tax credits receivable. Cash and cash equivalents and tax credits receivable exceed the current outflow requirements.

#### 24. CONTINGENCIES AND COMMITMENTS

The Company is partially financed through the issuance of flow-through shares and, according to tax rules regarding this type of financing, the Company is engaged in realizing mining exploration work.

These tax rules also set deadlines for carrying out the exploration work, which must be performed no later than the earlier of the following dates:

- Two years following the flow-through placement;
- One year after the Company has renounced the tax deductions relating to the exploration work.

However, there is no guarantee that the Company's exploration expenses will qualify as Canadian exploration expenses, even if the Company is committed to taking all the necessary measures in this regard. Refusal of certain expenses by the tax authorities could have a negative tax impact for investors

During the exercise ended June 30, 2016, the Company received an amount of \$2,243,750 (\$1,018,775 on June 30, 2015) from flow-through placement, for which the Company renounced or will renounce to tax deductions on December 31, 2015 and 2016. Management is required to fulfill commitments within the stipulated deadline of one year from the renounciation date.

The product of unspent funding related to flow-through financings totals \$1,664,246 to spend before December 31, 2017 (\$84,798 before December 31, 2015 and \$818,775 before December 31, 2016 on June 30, 2015). According to the fiscal legislation imposed restrictions, the Company has to dedicate these funds to the exploration of Canadian mining properties.
